Hi Kathryn and Rachel

I think these will be very helpful to people needing to do funding applications. As time goes on you may need to swap these out for newer ones, especially as the research data progresses and the evidence builds to make sure the most current evidence is available. I am sure other people would be happy to have theirs used. Sadly I think there is always going to be a need for these examples as grant funding rather than core funding seems to be required more and more. I am wondering if in the future there could be some links to funding streams? Not sure if there is anyone in AVIGuk with that knowledge?

Best wishes

Clare

Dear Rachel

Sorry this has taken some time to get to you- it took longer than I anticipated to anonymise the documents.

I have attached four documents that I used for VIG commissioning, however the final business case was sadly unsuccessful.

Clare I am copying you into this email- Rachel is working on the AVIGuk website- public portal and we thought it would be helpful to show some worked examples of how to commission a VIG project. The more detailed Sample Business Case Application was compiled with the help of the one you used in Cornwall. If you could kindly glance at these to let us know if you think they are worth using as examples, I would be grateful.

Many thanks.

Finally, Rachel on 27th April the board will be meeting next and I will then be able to address the other points about the public portal we discussed.
